

Special Operations Quick Release IFAK

Special Operations Quick Release IFAK

Product Description

The Special Operations Quick Release IFAK was designed with focus on combat operator placement and use. The quick release pull tab allows for an operator to access the IFAK under any condition.

The content is created to support Special Operations Operators and medical content is vacuum sealed to maintain protection in all austere environments.

This system is available to be purchased as a complete kit to include a tourniquet/holder or Refill kits. Content of kit available upon request.
